YOUSEF MOHAMED AHMED

Backend Developer | Node.js | Express.js | TypeScript | MongoDB
+20 150 158 0498 | yousefshohber@gmail.com | GitHub | LinkedIn | Dakahlia, Egypt

PROFESSIONAL SUMMARY

3rd-year Information Technology student at Zagazig University with hands-on experience in backend development using Node.js, TypeScript, Express.js, and MongoDB. Built and deployed multiple production-grade REST API projects focused on clean architecture, scalability, and performance optimization. Passionate about backend engineering and security; continuously building secure and production-ready server-side applications.

PROJECTS

Event Booking & Queue Management System — *Node.js / TypeScript / Express.js / MongoDB / Redis / BullMQ / Socket.io / JWT / Cloudinary*

- Built a production-ready REST API for event booking with real-time queue management and WebSocket notifications.
- Implemented atomic slot booking using Redis Lua scripts to prevent race conditions under concurrent load.
- Designed a FIFO waitlist with auto-promotion via BullMQ workers; integrated Google OAuth, email OTP, and JWT refresh token rotation with reuse detection.

FreelanceHub Platform API — *Node.js / Express.js / MongoDB / Redis / BullMQ / JWT / Cloudinary / RBAC / OAuth*

- Built a production-ready REST API for a freelance marketplace managing the full hiring lifecycle from job posting to contract completion.
- Designed async notification pipeline with BullMQ workers for email queuing; integrated Google OAuth2, email OTP verification, and JWT refresh token rotation.
- Implemented atomic proposal acceptance using MongoDB findOneAndUpdate to prevent race conditions under concurrent load.

Restaurant Management API — *Node.js / Express.js / MongoDB / Redis / JWT / Cloudinary / RBAC / OAuth*

- Developed backend to manage menu items, orders, and customer data with admin endpoints.
- Applied MVC architecture and modular routing for a clean, maintainable codebase.

TECHNICAL SKILLS

Backend	Node.js, TypeScript, Express.js, REST API Design (CRUD, Pagination, Filtering, Versioning), MVC Architecture
Auth & Security	JWT, Google OAuth2, bcrypt, Refresh Token Rotation, RBAC, OTP Verification, CORS, Helmet, Rate Limiting, XSS & CSRF Protection, Idempotency Keys
Real-time / Queue	Socket.io, Redis Pub/Sub, BullMQ, Atomic Lua Scripts, Distributed Locking, Job Scheduling
Database	MongoDB, Mongoose (Transactions, TTL Indexes, Virtual Fields)
Payment	Paymob — HMAC-SHA512 webhook, 3-step iframe flow, refund handling
File & Email	Multer, Cloudinary, Nodemailer (OTP, Password Reset)
Validation / Log	Zod, Joi, Request Sanitization, Pino, Morgan, Winston
Frontend	HTML5, CSS3, JavaScript ES6+, TypeScript, Bootstrap
Tools	Git, GitHub, Postman, npm, VS Code
Languages	Arabic (Native), English (Intermediate - Technical)

EDUCATION

Bachelor of Science in Information Technology | Expected 2027
Faculty of Computers and Information — Zagazig University, Egypt

TRAINING & CERTIFICATIONS

MEAN Stack Development — Full Stack Training (210 Hours)
National Telecommunication Institute (NTI) — Zagazig, Egypt

- Studied MongoDB, Express.js, Angular, and Node.js with a backend-focused approach.

The Complete JavaScript Course 2025 — Udemy (71 Hours)

- Studied modern JavaScript ES6+, OOP, asynchronous programming, DOM manipulation, APIs.

Modern JavaScript & Backend Node.js — Manara (40 Hours)

- Covered JavaScript ES6+, REST APIs, server-side logic, and database integration.
